# Arnab Das

9304832942 | arnabdas40922@gmail.com | LinkedIn | GitHub

## Education

**Arka Jain University** — Jamshedpur
*Bachelor of Computer Applications, Major in Cyber Security* — *Aug. 2023 – May 2026*

**D.B.M.S KADMA HIGH SCHOOL** — **Jamshedpur**
*Senior Secondary (CBSE)* — *Aug. 2021 – May 2023*

## Experience

**Information Security Intern,** — Aug 2025 – Oct 2025
*Tata Steel* — *Jamshedpur*

- Assisted in monitoring and analyzing security events using SIEM tools to identify potential threats and anomalies.
- Prepared security reports and documentation for internal project managers and review meetings.
- Performed basic application and network security assessments under supervision.

**Jr. Cybersecurity Intern** — April 2025 – June 2025
**FLANDEZ SOFTWARE SOLUTIONS** — *Sonari, Jamshedpur*

- Developed internal cybersecurity tools and automated scripts to support application security testing and threat detection
- Assisted in vulnerability assessment and controlled exploit simulation to evaluate real-world attack scenarios
- Applied secure coding practices and remediation techniques during security research and testing activities.

## Projects

**DATABASEMATE** | *Python, SQLite, NLP, Local LLMs* — Demo

- Built an offline AI-driven CLI tool that translates natural language into SQL queries
- Integrated local LLMs to execute database operations without internet dependency
- Implemented secure SQLite execution with schema management and query validation

**Cybersecurity Research Projects** | *Python, OS Internals, Networking, C2 control* — GitHub

- Built multiple offensive security proof-of-concepts to study attack vectors, persistence, and command-and-control techniques
- Implemented controlled demonstrations of data exfiltration, keylogging, and remote administration for defensive security learning
- Analyzed attacker behavior to improve endpoint security awareness and mitigation strategies

**RISKYURL** | *Python, Flask, Security APIs, Threat Intelligence* — GitHub

- Built a Flask-based URL risk analysis tool to identify potentially malicious or phishing links
- Performs **layered web security analysis** covering SQL injection, XSS, CSRF, and input validation weaknesses
- Implemented threat analysis using URL structure, domain reputation, and redirection behavior

## Technical Skills

**Languages**: Bash, Python, C/C++, SQL , JavaScript, HTML/CSS, R
**Frameworks**: MITRE ATT&CK, SQLite , Flask, WordPress, Material-UI, Arduino Framework
**Developer Tools**: Git, Docker, Burp Suite, Nmap, Visual Studio, Splunk SIEM

## Courses & Certifications

- Completed Google Cybersecurity Professional Certificate (Coursera). — Certificate
- An Introduction to Programming the Internet of Things (IoT) – Coursera. — Certificate
- Computer Communications (Coursera) – networking, protocols, data transmission. — Certificate
